PSM136 Studio Master Mains Purifier

With its six independent outputs the PSM136 Mains Purifier will elevate your system to a new level of performance.

With the PSM136 installed definition takes an enormous stride forward, individual instruments gain air between them, their sound and timbre becomes believable, the soundstage moves out from the speakers and into the room with gains in three dimensionality. Clarity and definition of the instruments are enhanced. Audible separation is observed as the instruments interrelate with each other - no more muddle. Your listening becomes a more engaging and pleasurable experience. Visual equipment performs to a higher level of noiseless richness and definition.

- Rebalances the AC sine wave, removing all DC components, this enables transformers to work efficiently and quietly
- Electrically and magnetically shielded casing
- Six independently filtered 10 amp outlets avoids cross contamination
- Multiple cumulative stages of purification removes common and differential mode interference
- Equal resistance, maximum power routing to all outputs
- Massive 30,000 amps of three dimensional surge protection
- Star earthing path
- Cleansed earth
- Internal wiring silver plated OFC copper PTFE insulation
- Rated Voltage 220-240 (Other voltages available)
- IEC type C20 Input
- Dimensions in mm W 430 D230 H 110 Weight 9 KG
